# Precision Automation of Western Blot

## a better way to do western blot

### how it works:

program the system

add your antibodies,  
blocking and  
wash buffers

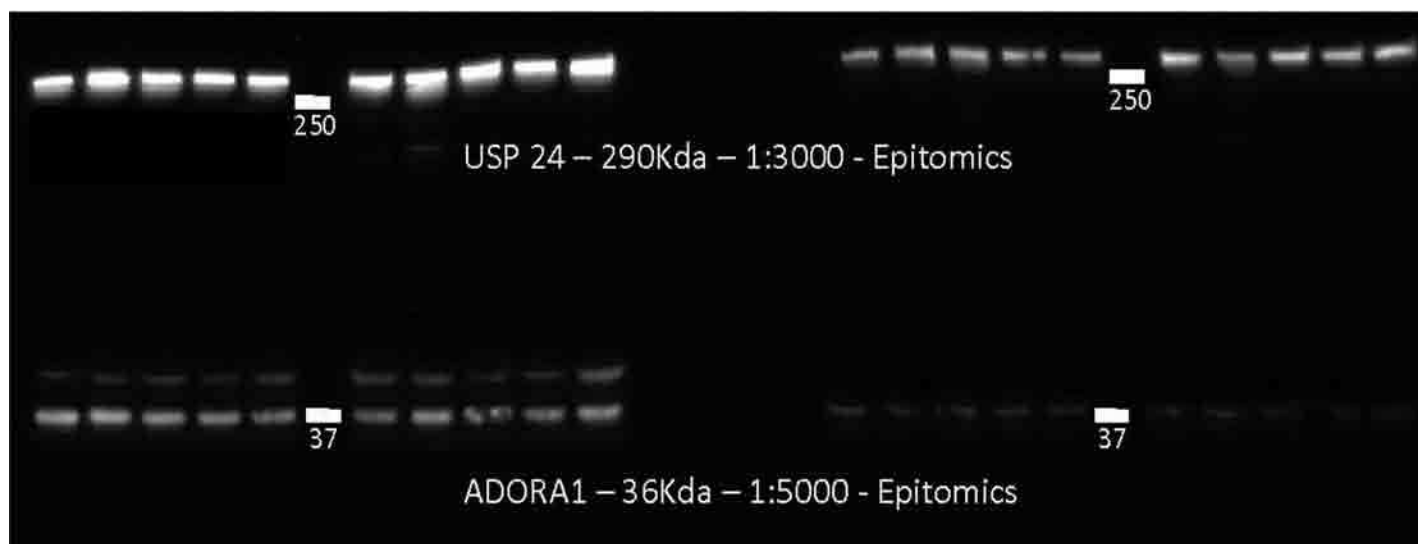

walk away

Use the touch screen interface to select and design your protocol

Fill tank with washing buffer and add up to six different antibodies

BlotCycler , 4°C.

Manual

**BlotCycler™ processes western blots using patented fluidic technology**

**Automation increases productivity, saves antibodies  
and ensures reproducibility of protein detection**

**BlotCycler pays for itself in about 30 uses**
